We need people who love a challenge!

United States ThermoAmp Inc. manufactures the Heat Siphon Swimming Pool Heat Pump in Latrobe, Pa. and sell to pool owners , pool dealers HVAC service centers and pool equipment distributors throughout the world. Established in 1983.

This is a ground floor opportunity to join an established and very innovative manufacturing company that is poised and committed to significant growth.

You will be responsible for set up & programming operating, tooling and maintaining our CNC manufacturing equipment including a Haas Lathe and CNC Milling machine, CNC tube bending and cutoff equipment, CNC Router and PLC controlled vacuum forming machines.

Your primary responsibility will be manufacturing production with bonus pay based on output.

You will also be expected to support R&D of new products, such as making molds, new equipment and tooling and will be involved in and be directly responsible for all phases of CNC manufacturing.

This is a challenging position with significant growth potential.

We are looking for someone who will make a long

term commitment to help us grow and expand our production output, increase our efficiency and reduce our manufacturing costs.

Journeyman's papers preferred

The following are CRITICAL to this Job:
